CACTI, AGAVES

And Other Succulents

~~LYON & COBBE~~

~~LOS ANGELES, CALIFORNIA, U. S. A.~~

Orcutt Seed & Plant Co.

*San Diego
Cal.*

TO OUR PATRONS:

Having, during the past year, handled the business of the Orcutt Seed and Plant Company, to which we have succeeded, we are in a position to afford our patrons a much better opportunity than heretofore to obtain what they desire in our lines.

Our experience with collectors has taught us that what we rely on to collect we cannot depend on to offer; and, though in the past we have offered in good faith only what we fully expected to be able to supply, we realize that our disappointments must cause annoyance to our trade.

In conformance with this view we have determined this year to offer only such things as we have in good stock, with the addition (clearly noted in the price list) of what we have already made arrangements to collect in time for shipment the coming season.

We send none but healthy, good plants; being home-grown they are mostly larger and in better condition than those usually supplied.

All plants are carefully packed according to requirements, which our experience enables us to meet successfully.

Where not otherwise ordered we send mixed sizes.

WHOLESALE PRICE LIST OF CACTI AND SUCCULENTS

Plants marked * we are usually able to collect, and, though not in stock at present, are expected shortly, and in time to make shipment this season.

Plants marked † are in limited supply at present.

Synonyms are printed in *italics*.

Prices are per 100. Single plants 25 per cent additional.

Terms—As we are not collecting to order, but have collected and established a good supply of all the above (except where otherwise noted), and can therefore *promptly fill orders from stock*, our terms are strictly *Cash with order* for all kinds listed as being in stock. Where plants “expected” are ordered, payment will be due on shipment of the goods. Where cash is not sent with the order we shall make sight draft with bill of lading attached.

Having collectors constantly in the field in California and Arizona, as well as in Mexico and the islands, we shall often have a supply of many species not listed; and we beg our customers to write to us always for any kinds native of these parts, of which they may be in want.

Our object will be to supply at the lowest cost consistent with a *reliable supply of good plants*, all the cacti and succulents obtainable in the above districts, and to give special attention to correct nomenclature, to prevent disappointment.

We issue, also, a list of California Bulbs, etc., and invite *correspondence* in regard to any of our native or Mexican plants or seeds.

Novelties and Rarities.

[Measurements are inside of spines, in Centimetres.]

- Cereus chloranthus**, var. **cæspitosus**—A few fine colored specimens; 75c to \$1.50 each.
- Cereus Cochal**, Orcutt—Bright green, tree like, with stout black spines, flowers greenish white; \$60.00 per 100.
- Cereus Engelmanni**, and varieties—Fine clusters, 3-6 heads, large; \$1.00 to 2.50 each.
- Cereus gummosus**, Engelm—A large species with broad black spines, plants 25-35 cm. high; \$100.00 per 100.
- Cereus maritimus**, M. E. Jones—A little known, low-growing, cæspitose species; \$75.00 per 100.
- Cereus mojaveusis**, Engelm—A cæspitose kind, of great symmetry, hundreds of heads growing sometimes into one great hemisphere, covered with blood-red blossoms.
Single plants \$50.00 per 100.
Clusters 3-5 heads \$1.50 each.
Large clusters \$2.00 to \$5.00 each, and up to \$200.00.
- Cereus Pringlei**, Watson—The "Giant" of Lower California, growing sometimes fifty feet high. Plants from 25 to 60 cm. high; \$200.00 per 100.
- Echinocactus Emoryi**, var. **chrysacanthus**—A beautiful new variety of E. Emoryi from the islands of Lower California, having twisted yellow spines, handsomer than E. Grusoni. Flowers, satiny-orange, sometimes with broad crimson mid-vein.
5-7 cm. diam. \$100.00 per 100.
7-12 cm. diam. \$150.00 per 100.
Large plants, 15-20 cm. diam. \$2.50 each.
- Echinocactus Emoryi**, var. — (No. 201), from Lower California—Dark crimson flowers; \$100.00 per 100.
- Echinocactus McDowellii**, Rébut—Mammillaria-like, thickly set with long, straight, yellowish-white spines, from among which the mauve-pink blossoms hardly push out; \$60.00 per 100.
- Echinocactus polycephalus**—We have some fine clusters about 30 cm. in diam. \$3.00 to \$5.00 each.
- Echinocactus Trollietii**, Rébut. (No. 79)—Egg-shaped, very symmetrical, with dark spines lying close to the body. Flowers chocolate and yellow; \$2.00 each.
- Mammillaria Goodridgii monstrosa**—A beautiful symmetrical specimen 10 cm. across; price \$10.00.
- Mammillaria Halei**, Coulter—Cereus-like, with straight, long, stiff, purplish-brown spines, scarlet flower and large red fruit. From the islands of Lower California. Makes fine clusters. Good plants 8-15 cm. high, \$100.00 per 100.
- Mammillaria radiosa Alversonii**, Coulter—A fine upright grower, after the style of M. Arizona, but far finer, and a native of the Californian desert; \$50.00 per 100.
- Pilocereus Sargentianus**, Orcutt—When young bare, with small bunches of star-shaped spines along the 5 or 6 ribs, resembling the appearance of C. gemmatus; when older covered with soft, white bristles, 3-6 cm. long along the ridges of the clear-cut ribs. Body, a clear, pale green. Flowers pink, profuse along the ribs and half way down the plant.
Plants 6-15 cm. high \$150.00 per 100.
15-40 cm. high \$250.00 per 100.
A few large specimens, 30-50 cm. high, \$4.00 and \$5.00 each.
- Cereus Eruca**, Brandegees—Grows erect or procumbent like huge caterpillars, with pearly-gray prominent reflexed spines.
10-15 cm. high, \$100.00 per 100.
15-30 cm. high, \$150.00 per 100.
